SHAIK ZAIBA FARAAZ

ECE Undergraduate | Embedded Systems & AI Enthusiast

shaikzaiba1306@gmail.com | +91-9515008405 | Chittoor, Andhra Pradesh

CAREER OBJECTIVE

Motivated B.Tech Electronics & Communication Engineering student (2nd year, 9.7 CGPA) with a strong foundation in C/C++, DSA, Python, Web Development, VLSI, IoT, and Machine Learning. Hackathon winner with 2 internships and 5 hands-on projects. Seeking roles in hardware-driven domains (ISRO, DRDO, Defence) and software/product companies (Google, Amazon, MNCs) where I can build impactful, real-world solutions.

EDUCATION

B.Tech – Electronics & Communication Engineering — *Vemu Institute of Technology, Chittoor* 2025 – 2028

CGPA: 9.7 / 10

Diploma – Electronics & Telecommunication Engineering — *Vemu Institute of Technology, Chittoor* 2022 – 2025

97.3% | Department Topper

TECHNICAL SKILLS

Languages: C, C++, Python, DSA (Arrays, Linked Lists, Stacks, Queues, Sorting/Searching)

Web: HTML, CSS (JavaScript in progress)

Hardware & Electronics: VLSI Design, Embedded Systems & IoT (Arduino, sensors, microcontrollers), PCB Design, Robotics (eYantra)

AI/ML & Cloud: Supervised Learning, scikit-learn, Pandas, NumPy, GenAI, Google Cloud (Arcade Facilitator)

INTERNSHIP EXPERIENCE

Machine Learning Intern — *ML Internship* 2025 – 2026 (6 Months)

- Applied supervised ML algorithms to real datasets — data cleaning, feature engineering, and model evaluation
- Built and validated classification and regression models using Python (scikit-learn, Pandas, NumPy)

Production / Hardware Intern — *Hitachi Terminal Solutions Pvt. Ltd., Bangalore* Nov 2024 – May 2025

- Performed wire wrapping, cable assembly, and quality checking for production units; maintained zero-defect standards

KEY PROJECTS

AI-Powered Road Accident Prevention System Jan – Mar 2026

- Real-time driver monitoring using Python, OpenCV & ML to detect drowsiness; sensor/camera-triggered alerts in <1 second

Smart Grid Monitoring System In Progress

- IoT-based real-time monitoring of grid load, voltage, and faults for predictive maintenance

Quantum Repeater Communication Simulation In Progress

- Simulating a quantum repeater to model reliable long-distance quantum communication using entanglement swapping

WORKSHOPS & ACHIEVEMENTS

- Winner – Hackathon 2026, Chadalawada Ramanamma Engineering College
- eYantra Sprint, 3D Printing (3-day) & PCB Design (2-day) Workshops
- Google Arcade Facilitator with multiple Google Cloud skill badges
- GenAI-Powered Data Analytics Job Simulation – Forage (2026)

LANGUAGES & INTERESTS

Languages: English (Professional), Telugu (Native), Hindi (Fluent), Urdu, Tamil, Kannada (Spoken)

Interests: Embedded Systems & VLSI, ML & AI, IoT & Smart Systems, Quantum Communication, Space Technology
